

Shankara Buildpro is India's largest steel tube supplier and the country's premier one-stop destination for all building materials and home improvement needs. With 53 years of excellence, we have established ourselves as a trusted provider of high-quality construction solutions. Now, we are taking our commitment a step further by venturing into complete home construction—bringing our expertise, reliability, and dedication to excellence directly to homeowners. In partnership with BuildNext, India's leading custom home builder, we combine our deep material knowledge with skilled craftsmanship and innovative design to offer end-to-end home-building solutions. Whether it's your first home, a dream upgrade, or a custom project, we guide you through every stage from planning and design to handing over the keys. With Buildpro Homes, you don't just get a builder you gain a trusted partner dedicated to turning your vision into reality. Our legacy of quality, combined with modern construction expertise, ensures that your dream home is built to perfection.

Shankara Building Products Ltd, with a 53-year legacy, is India's largest distributor and retailer of steel pipes and tubes. Buildpro serves as a multi-territory, multi-product and multi-brand marketplace for building materials, offering everything from steel tubes, flats, longs and sheets to construction chemicals, plumbing, fittings, sanitaryware, tiles, electricals, paints, roofing, hardware and much more. With an ISO 9001 certification and a turnover exceeding ₹6000 crores, the company has established itself as a trusted name across South, West, and East India, delivering top-quality products at competitive prices with exceptional service. As a true omnichannel one-stop shop, Shankara Buildpro meets all construction and home improvement needs through its extensive portfolio. The company boasts in-house brands like Ganga, Taurus, Samrat, Loha, Fotia, Brizzio, Vaigai, offering a diverse range of products, including roofing solutions, steel tubes, steel accessories, tiles and sanitaryware. Supported by a robust infrastructure, the company operates 125+ fulfillment centers, 12 processing facilities, and over 600,000 sq.ft. of warehousing space, ensuring seamless access to 2 lakh+ SKUs from 150+ brands across 100+ product categories. This vast selection, combined with its strong logistical network, positions the company as a leader in the building materials sector, committed to quality, affordability, and customer satisfaction.

BuildNext is redefining the way homes are imagined, planned, and built, powering the best homebuilding brands for the 21st century. As a visionary homebuilding platform, BuildNext brings together the perfect blend of great design, scientific construction methods, and innovative technology to make the entire process smarter, faster, and more transparent.

At the core of BuildNext's model is its commitment to precision and efficiency. The platform uses innovative tech solutions such as app-based real-time project tracking and immersive Virtual Reality experiences to give homebuyers complete control and clarity over every step of the journey. Clients can visualize their future home and track progress live from anywhere.

BuildNext's ecosystem is built around rigorous quality control, monitored throughout the construction lifecycle. It also offers a process-driven experience, supercharging the construction journey from start to finish.

BuildNext empowers you to create future-ready homes that reflect your vision. This is not just innovation; this is the future of homebuilding, delivered today.

How it Works ?

Booking, Plan finalization & Construction

At Buildpro Homes, our booking, plan finalization & construction processes are crafted to make your journey to a new home smooth, efficient and transparent.

Once your booking is confirmed and payment is made, we immediately begin developing your home plan in collaboration with a qualified remote architect. This early start helps us save time and maintain momentum.

After your plan is finalized, we share the basic project estimate for your approval. Upon confirmation and

payment we move directly into structural design, which is then translated into detailed construction drawings for our on-site teams.

Construction begins as soon as the drawings are ready. In parallel, our architect works closely with you to finalize the elevation design. While site mobilization and on-site construction is underway, the elevation design finalization continues in parallel ensuring minimal waiting and smooth coordination between design and execution.

Once the elevation and any customizations are finalized, we provide a clear and transparent approval process for all customization, along with detailed costing. This ensures you have full clarity and control over your decisions.

Throughout the entire process, we keep you updated with regular progress reports so you're always informed. As construction nears completion, we carry out final installations and thorough quality checks to ensure everything meets our standards. This way, your dream home comes to life just as it was envisioned.

Consult with our Expert Home Consultant
Start your journey with a personalized consultation to discuss your vision, needs, and budget

Simple on App Booking
Easily book your project through our user-friendly app with the booking amount to get started

Transparent approval on elevation and customization costing

Transparent approval process for the selected designs and customizations

Essential Design and Drawing

Essential design and drawing services are part of the pack. It offers a clear 2D floor plans designed by professional Architect and detailed elevation renderings providing accurate visual representations of your home.

Detailed 2 Dimensional Floor Plans

Precise 2D floor plans are, created with professional design software, provide a clear and accurate representation of your future home. These detailed plans help you envision the layout and optimize space.

Designed by Professional Architect

A fully qualified, experienced architect will assist you remotely to gather your requirements and create plans as per the package, ensuring accuracy and efficiency throughout the process.

High Quality Elevation Renderings

Elevation renderings offer a detailed view of your home's exterior, highlighting key design elements. These visualizations allow you to fully envision the final look early in the project. By providing a clear representation of the design, elevation renderings help in making informed decisions upfront, leading to a smoother and more efficient building process

A Welcoming Living Room

The living room is designed for functionality, comfort, and elegance, with a focus on lighting. Provisions for four ceiling-mounted surface lights, enhance the space's ambiance. Modern flooring, a highlight wall, and well placed electrical points ensure convenience and efficiency in daily living.

Highlights

- Thoughtfully positioned provisions for four surface lights (without the need for a false ceiling) strike a perfect balance between aesthetics and value. These additions bring a touch of sophistication while enhancing the ambiance of the living space.
- The flooring, finished with elegant vitrified tiles, offers a sleek, durable, and low-maintenance surface that enhances the overall aesthetic
- A highlight wall is included as a key design feature, thoughtfully positioned to serve as a visual focal point in the space
- To enhance everyday convenience, switchboards are strategically placed at the entrance, near the seating area provision, and by the entertainment unit provision. This ensures ease of access while maintaining a clean appearance.
- One two-way switch for the outdoor lamp is placed at the entrance of living room, allowing the outdoor lighting to be controlled with ease in one living room
- The TV area is equipped with a DTH provision (TV socket), a LAN provision point for providing Internet access, and plug points to power the provision for TV, DTH box and WiFi router.
- A convenient plug point is located near the seating area, perfect for charging mobiles or powering small electronic devices.

A Stylish Dining Room

The dining room and common wash basin area are designed with elegance, featuring strategically placed ceiling light provisions and a highlight wall to enhance the ambiance. Thoughtful electrical provisions and modern features are incorporated to elevate both functionality and style.

Highlights

- Thoughtfully positioned provisions for four surface lights (without the need for a false ceiling) strike a perfect balance between aesthetics and value. These additions bring a touch of sophistication while enhancing the ambiance of the living space.
- A highlight wall is included as a key design feature, thoughtfully positioned to serve as a visual focal point in the space
- The dining room features a spacious main dining area, complemented by a conveniently located common wash basin, ideal for everyday use.
- The design also includes provision for placing a Robotic vacuum docking station, ensuring seamless functionality and easy maintenance.
- The space is elevated with sleek vitrified tile flooring, which are durable and low maintenance.
- The common wash basin area, is thoughtfully positioned with a provision for a lamp and location for a mirror. A switch allows for easy installation of a mirror lamp, complete with necessary wiring to ensure optimal lighting for daily use.
- The wall-hung half pedestal wash basin adds a modern, space-saving design, contributing to a contemporary look. A stylish backsplash not only complements the basin's design but also offers enhanced functionality.

Comfort-First Bedrooms

Along with essential electrical provisions, Elevate bedrooms include ceiling mounted surface light provisions, full AC provisions, and switchboards on both sides of the bed for added convenience. Practical plug points and elegant flooring enhance comfort and usability.

Highlights

- Thoughtfully positioned provisions for surface lights in the bedroom (without the need for a false ceiling) create a perfect blend of style and functionality. These carefully placed fixtures add a sense of warmth and elegance, enhancing the overall atmosphere while maintaining practical value.
- All bedrooms are designed with provision for electricals for an AC, to support air conditioning.
- Bedside plug points on both sides of the bed offer added convenience, allowing easy access to charge devices on either side.
- The TV area (available in one Bedroom) is equipped with a DTH provision (TV socket), a LAN provision point for Internet access, and plug points to power the TV, DTH box, and WiFi router, ensuring convenience and connectivity within the space.
- The room is finished with elegant vitrified tile flooring, adding a modern, sleek touch that's also easy to maintain.
- The bedroom is thoughtfully designed with switches near the entrance and both bedside for easy access.
- A Switch board (On one side of bed) offers added convenience of 2 way switches and a large fan regulator, for easy adjustment of fan speed.

A Well-Appointed Kitchen

The kitchen is equipped with essential electrical provisions, a high-quality granite countertop, and a premium sink. Thoughtful layout and durable finishes ensure a functional and refined cooking space.

Highlights

- The kitchen is laid out with vitrified flooring, offering easy maintenance and a stylish look, complemented by a granite countertop that combines durability and elegance for cooking and food preparation. The design meets the needs of an essential kitchen with plug points for essential appliances, with thoughtfully placed provisions for a practical and convenient daily kitchen experience.
- Backsplash tiles are installed upto a height of 60 cm from the countertop, enhancing both durability and visual appeal.
- Dishwasher Provision: Space and connections are provided for easy dishwasher installation.
- The kitchen is equipped with a durable single-bowl sink paired with a wall-mounted faucet, combining long-lasting performance with a sleek, functional design.
- Over Counter Plug Point: A plug point is installed over the counter, perfect for attaching a mixer or microwave.
- Exhaust Fan/Hood Provision: A switch for the exhaust fan/hood, with a plug point conveniently located near the cooking zone.
- Fridge Provision: A dedicated plug point for the fridge, ensuring hassle-free installation.
- Water Purifier Provision: A plug point and water inlet are conveniently located near the sink for a water purifier to be installed.

Refined Bathrooms

Designed for everyday comfort and modern style, the bathroom includes hot and cold water provisions, geyser points, and essential fixtures. Enhanced with epoxy grouting, upgraded sanitaryware, and a wall mixer, it offers a more refined experience. Durable ceramic tile finishes and well-placed electrical points ensure functionality and easy maintenance.

Highlights

- Experience comfort and cleanliness with a sleek, water-saving hygiene setup, featuring a stylish geometric bowl, soft-close seat, and durable chrome health faucet.
- Elevate your bathroom with a sleek half-pedestal wash basin with practical overflow provision for a perfect blend.
- A stylish chrome wall mixer, dual-flow system, and overhead shower, designed for both elegance and ease of use.
- Basic electrical provisions include an LED light switch and exhaust fan switch outside the bathroom, along with a geyser switch
- Inside the bathroom, there is a switch for the mirror lamp and a plug point for additional electrical needs.
- The floor is finished with ceramic tiles, laid using mortar and epoxy filler for durability and ease of cleaning.
- Bathroom walls are covered with ceramic tiles up to 7 feet in height, applied using adhesive and **Epoxy filler**.
- Provision for a geyser plug point is included for easy installation and use.
- **Waterproofing with manufacturers warranty is provided for all bathrooms.** Waterproofing on the floor and up to 2 feet on the walls is provided in the package

Thoughtfully Designed Common Areas

These common areas includes well-placed switches and provisions for lighting, fans, and essential utilities, ensuring a seamless, efficient living experience. Enhancements such as foot lamp in the staircase, provision for up and down light, increased outdoor lighting provisions, and an improved handrail add elegance to the space.

Highlights

- Car Charging: A dedicated 32A provision with appropriate wiring is provided for the easy installation of an EV (electric vehicle) charger.
- Staircase Lighting provision : Two-way switches at top and bottom of the staircase, ensuring convenient control
- **Balcony: Provision for a wall light and a ceiling fan with an appropriately placed switch ensures adequate illumination and air circulation**
- Sit-out Area: Includes a switch for a wall light and a large (2 module) switch for a calling bell.
- **External light provisions: Includes six wall light provisions at external doors and sides of the home for improved visibility and security.**
- External Tap Points: Two tap points are provided in outdoor areas for general water access
- Solar Power Provision: An electrical point is provided on the roof, allowing for seamless solar panel integration.
- Inverter Provision: A dedicated switch and wiring enable the smooth installation of an inverter to support backup power.
- Motor & Switchboard: A 1 HP centrifugal pump supported by a dedicated switchboard located on the ground floor for easy access and control.
- Washing Machine Point: One 16A plug point, along with water inlet and outlet provisions, is provided to ensure easy washing machine setup
- Staircase Handrail: A MS handrail of pre selected design is installed for safety while using the staircase.
- Tiles: Durable tiles are laid in staircase, sitout, Balcony and car porch, offering a clean, finished, and practical flooring

Note: Any area not under the slab, is not considered part of rooms or common areas and will not include the facilities for the rooms/areas mentioned in the package and is chargeable separately.

Refer : Terms and Conditions for more details

Electrical Works

The electrical works will include the provision and installation of high-quality conduits, concealed within slabs and walls for a clean and secure finish. Fire-retardant copper wiring (Finolex) will be used to ensure safety. Switches and plates from the GM GX series in white, or an equivalent brand, along with X2 plates or their equivalent, will be installed. A main distribution board (DB) of TPN (Three Phase) type, equipped with MCBs from Legrand or an equivalent brand, is included in the scope of work. Please note that this package does not include the main electrical supply connection from the external source. It also excludes underground cables, energy meter, meter box, panel board, or any related infrastructure. Additionally, connections from the external supply up to the Distribution Board (DB) and any necessary approvals from local authorities are not included. For more information, please refer to the terms and conditions.

Plumbing Works

The complete domestic water line includes both internal and external plumbing within the plot. The sewage system will feature two inspection chambers, with a sewage outlet connected to the main inspection chamber located at the site boundary. Internal and external water lines will use cPVC pipes from Supreme or an equivalent brand, while sewage and drainage lines will be executed with PVC pipes from Supreme or an equivalent. A PVC overhead water tank of 1000 liters (Sintex or equivalent, one unit) will also be provided. Please note that this package does not include water or sewage supply connections, approvals from authorities, or any plumbing work beyond the site boundary. For further details, please refer to the Terms and Conditions.

Doors and Windows details

- The sizes mentioned refer to the clear opening from plastered surface to plastered surface, within which the door or window unit will be fitted.
- The window grills will be supplied and installed at a rate of ₹180 per sq.ft.
- Pre-selected grills will be installed on the inner side of the window opening, while the uPVC window unit will be fitted on the outer side.
- All windows and Doors will be provided in standard sizes and quantity; if the total window area exceeds 10% of the slab area, an additional charge will apply.
- Windows are 2.5-track sliding with integrated mosquito mesh and fitted with 5mm clear glass. The windows will be supplied and installed at a rate of ₹380 per sq.ft.
- The package includes pre-selected steel main door at ₹25,000/piece, FRP internal doors at ₹11,000/piece, WPC external doors with enamel finish at ₹14,000/piece, and FRP toilet doors at ₹7,000/piece as per door specifications.

Structure

The structure of the building is broadly divided into two main parts: the substructure and the superstructure. The substructure, or foundation, includes the plinth and all structural components below it, providing essential support and stability to the entire building. The superstructure refers specifically to the civil structure above the plinth level, including the walls, columns, beams, and slabs.
 #Refer Terms and conditions of structural warranty for more details

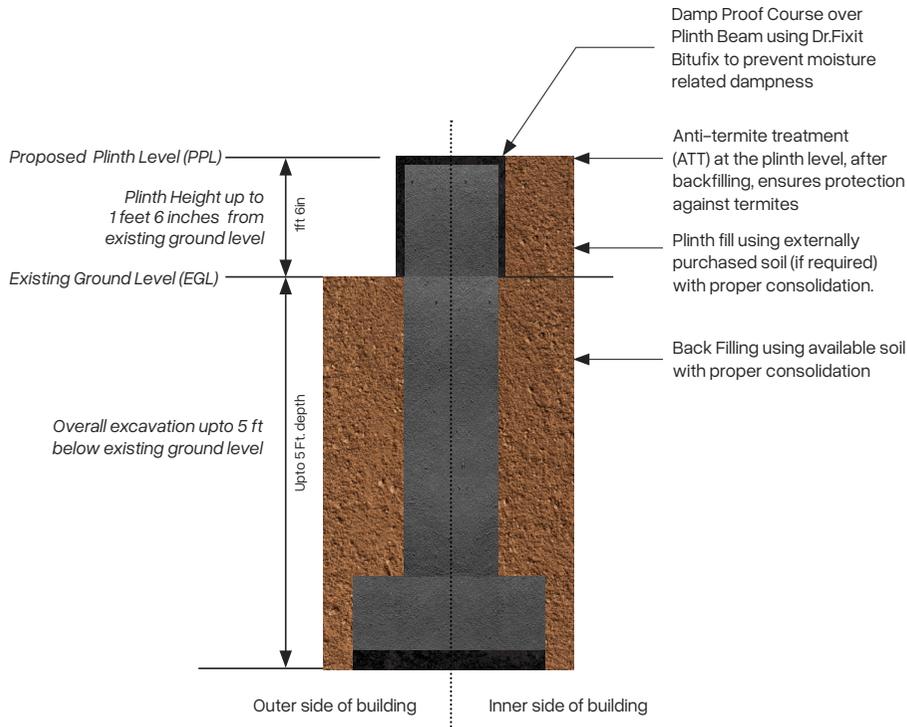

Sub Structure

The package includes only standard isolated footings for typical framed foundations. The following are the details of the foundation elements included in the package.

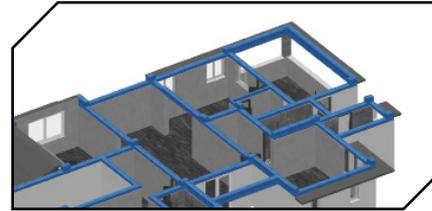

Details of Sub-Structure

The substructure includes all foundational elements up to the plinth level. This covers overall excavation up to 5 feet below ground level and construction of the plinth up to a height of 1 foot 6 inches from the existing ground level. A Damp Proof Course (DPC) is applied over the plinth beam using Dr. Fixit Bitufix (or equivalent). Anti-termite treatment (ATT) is carried out at the plinth level after backfilling and plinth filling to ensure protection against termites. Any additions over the aspects considered in the package is chargeable. Please check terms are conditions for more details.

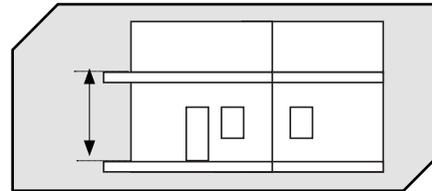

Super Structure

The superstructure is a critical part of a building, as it includes civil construction components above the foundation, such as walls, floors, and slabs. It provides the necessary support, stability, and protection from external elements. Following are the elements considered in the package

Full lintel across internal and external walls ensuring structural strength. (For all floors except the terrace headroom). The lintel is considered at a height of 7 feet from the floor where available.

Finished floor level top to Finished floor level top is considered as 10 ft. in the package for all floors (Except for terrace headroom where floor top to floor top will be 8 ft.)

Concrete works using 20 mm or 40 mm aggregates & manufactured sand of M20 / M25 mix (as per structural recommendation) for RCC and M10 mix for PCC

Cement Brand: **Maha / Priya** / Equivalent for plastering and brick work
 Steel Brand for TMT: **India Gold** / Equivalent

Material Limit Rates :

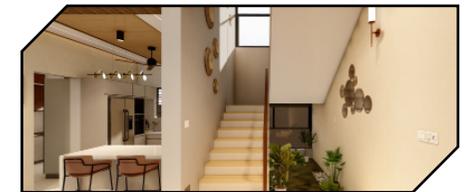

The cost of materials is covered up to the limit rates specified below in the package. Any increase in material prices beyond the limit rates will be considered additional and will be chargeable separately. Limit rates : (India Propel/Eq.) - ₹ 65/ kg , Cement (Maha/Eq.) - ₹ 360/ bag, AAC Blocks 23.5"x8"x6"- ₹ 75/ Pc, 23.5"x8"x4"- ₹ 52.5/ Pc, Manufactured sand ₹ 900/ Ton, Plastering Sand ₹ 1250/Ton and 20mm aggregate ₹ 800/ Ton, Red Earth ₹ 360/ ton and RMC ₹ 4,700/ Cubic meter is covered in the package.

Block work using AAC blocks
 External walls : 6" thick (Blocks of 23.5"x8"x6"),
 Internal walls : 4" thick (Blocks of 23.5"x8"x4")

- External, Terrace & Internal wall plastering : 15 mm
- Ceiling plastering : 12 mm
- External and terrace plastering, including an integral waterproofing compound, for enhanced durability (LW+/Eq.).
- **Terrace waterproofing done using Dr. Fixit FastFlex/ Equivalent**

RCC Dog-legged staircase with 1 landing and optimally sized stairs with 19 Steps from Floor to Floor and flat waist slab

Exciting Upgrade Packs !!!
